DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Suter (3,610,778).

Suter discloses rotor blade damper (Figs. 1-7) comprising a first bearing surface 19 (Fig. 7), a second bearing surface (opposite to that of surface 19; Fig. 7), a forward surface, an aft surface, wherein at least one of the surfaces is shaped to include at least one lengthwise extending groove 20;

wherein the rotor blade damper further comprising a first lengthwise end, and a second lengthwise end, wherein the at least one lengthwise extending groove extends substantially between the lengthwise ends (Fig. 7); and

wherein the surfaces are shaped to include a plurality of lengthwise extending grooves (the groove on the second surface, opposite to that of surface 19, of Fig. 7).

Allowable Subject Matter

3. Claims 1-10, which are considered as improvements over the US patent number 5,820,343, wherein the improvements comprising a damper is received in the channel and having

Art Unit: 3745

a lengthwise extending passage formed on one of its surfaces within the channel, and the passage permit cooling air travel in the lengthwise direction, are allowed.

4. Claims 11-13, due to the limitation of the damper has an arcuate lengthwise extending centerline, are considered an improvement over the US patent number 5,820,343, are allowed.

5. Claims 18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 1 patent.

Bobo (5,156,528) is cited to show a turbine blade damper having a lengthwise extending groove.
